

HOW TO BUY \$15K BTC IN 2 DAYS WITH A BANK LOG

Introduction

Now there are many methods online to make money from; cc top up, ach, bill pay ,direct deposit, wire, shopwitscrip and others but one disadvantage about some of these methods is that, once the client owner becomes greedy, he can quickly block you and enjoy the money Alone 😞.

That why when I need money urgently I prefer buying bitcoins with my bank logs, so once it is ready, I quickly transfer the btc to my coinbase or blockchain wallet and do whatever I want with it.

I started cashing out with this method in 2023 and it still active, hasn't casted yet so let start the process and make some big boy money.
