How to Deposit your Electronic CHECKS

1• Let client open the check you sent her on her laptop , and then open the Mobile app and take pic of the front and back of the check, to deposit into her bank.

2• Let client Use the laptop to sign the back of the check and then email to her bank, the bank will deposit the check themselves

3• Let the client Print out the check on a normal white plain sheet, sign the back, cut the edges of the paper and deposit at Atm.

In all these methods,make sure you endorse the back of the check (either by signing or writing full name).

All you need is a bank login with balance and you will be cashing out daily atleast $20k($5k checks times 4).
